Notes

Issues

Fixed blocked port to allow Apache/MySQL to connect

Ran into a few issues involving sending ID flags to filtered list php script

Initial setup to create appropriate database and table

Tested Setup script on separate computer to ensure no issues

Time also includes research on how to create certain diagrams
Recorded using Camtasia Free Trial

Estimated # of hours

Had small issue, script attempted to connect to a data base that did not exist, change to have it connect to just local host

Needed to download software to create certain diagrams.
Difficulty finding explanations on certain diagrams

Watermark on video due to trial version of software

Package all files and test one last time before upload
